- ✓ Interactive session with Case Studies
- ✓ Practice Tests with detailed answers and explanations
- ✓ End-to-end support via phone, mail, and chat
- ✓ PMI-PBA course adhered with International Standards of PMI
- ✓ Complete PMI-PBA® Application assistance

# Importance of PMI-PBA Certification

- ✓ Many organizations are shifting toward a dual role for Project Managers in which they act as both Project Manager and Business Analyst. PMI's Professional in Business Analysis (PMI-PBA®) certification is designed for project professionals who play both roles of PM and BA. The need for Business Analysis certifications is growing along with the role. According to research from the Project Management Institute, in the next five years, more than half of organizations plan to integrate their PM and BA practices. Much of this change is driven by agile adoptions. The PMI-PBA® certification is really about the different kinds of analysis that are needed. This includes needs assessment, analysis planning, traceability, and other analysis tools and techniques.
- ✓ This course provides an in-depth review of the business analysis knowledge, skills, and tasks as discussed in the PMI business analysis standard Business Analysis for Practitioners: A Practice Guide. The material within this course provides a solid overview of the activities commonly performed by those fulfilling the business analysis role on programs and projects. The content of this course is fully aligned to the definition of the business analysis practice as detailed within the role delineation survey completed for PMI in 2013. The course is intended to prepare students who are interested in taking the PMI-PBA® exam

# About Unichrone

✓ We are a professional training institute with an extensive portfolio of professional certification courses. Our training programs are meant for those who want to expand their horizons by acquiring professional certifications across the spectrum. We train small- and medium-sized organizations all around the world, including in USA, Canada, Australia, UK, Ireland and Germany.

## ELIGIBILITY CRITERIA

✓ Before taking this course, students should fulfill the Project Management Institute (PMI®) requirements for business analysis and general project experience. We recommend students read about these requirements in the PMI-PBA® Handbook. This course provides 35 contact hours needed to fulfill the PMI business analysis training requirements.

A separate application to take the PMI-PBA® examination is required. We recommend students read the PMI-PBA® Handbook and PMI-PBA® Examination Content Outline prior to the course. For maximum preparation value, students should be prepared to take the PMI-PBA® exam within 3 months of completing the prep course.

## WHO SHOULD ATTEND

✓ Practitioners who have been performing business analysis for at least three years. Certification prospects who are planning to take the PMIPBA® exam in the next 3-6 months. Students who desire to learn more about the PMI-PBA® certification exam and process. Any Certified Business Analyst Professional (CBAP®) considering obtaining a BA certification from PMI.
